

5 CLAIMS

1. A digital imaging system comprising:
  - (a) a capturing device that obtains at least one of a digital image and a digital video in a first format;
  - (b) a storage device that stores said at least one of a digital image and a digital video in a file free from modification of said first format;
  - (c) a presentation system that presents said at least one of a digital image and a digital video to a user free from modification of said file on said storage device;
  - (d) an editing system that modifies said at least one of a digital image and a digital video by associating with said at least one of a digital image and a digital video meta data free from modification of the image represented by said file on said storage device; and
  - (e) a managing system that renders said modified at least one of a digital image and a digital video by said editing system by applying said meta data to said at least one of a digital image and a digital video to modify the appearance of said at least one of a digital image and a digital video.
2. The system of claim 1 wherein said capturing device is a digital camera.
3. The system of claim 1 wherein said capturing device is a video camera.

5           4. The system of claim 1 wherein said storage device is at least one of a compact disk, a hard drive, a tape, a digital video disk, and an optical disk.

10          5. The system of claim 1 wherein said presentation system includes a browser.

15          6. A method of selecting desirable images for a user comprising:  
                 (a) maintaining a list of a plurality of desirable image content for a user that includes at least one of a digital image and a digital video;  
                 (b) determining potential additional image content for said user that includes at least one of an additional digital image and an additional digital video;  
                 (c) indicating to said user the potential desirability of adding said at least one of said additional digital image and said additional digital video in a manner free from interrupting the user's work flow.

20          7. The method of claim 6 wherein said indicating includes a visual indication.

5        8.      The method of claim 6 wherein said indicating includes an audible  
indication.

9.      The method of claim 1 wherein said capturing device is a stream of  
video.
